

## Practice Programming Activities

### CSE 205 – Fall 2017

1. Write a Java program that reads integers from the keyboard and then count number of odd numbers and even numbers entered
2. Write a Java program that reads an integer from the keyboard and find the summation of digits in the number. For example, if the user input is 1234 then the summation of digits is 10 ( $1+2+3+4$ )
3. Write a Java program that reads a string from the keyboard and display the string in the reverse order
4. Write a Java program that reads a sentence from the keyboard and reverse each word in the sentence
